

Joham Prepetit

Cyber Security Specialist

Joham.Prepetit@gmail.com | Jpsec.carrd.co

New York, NY | 516-384-2119

Cybersecurity professional with hands-on experience in vulnerability management, incident response, and network defense. Brings an analytical mindset, disciplined follow-through, and a deep interest in understanding how systems function and how to protect them. Eager to contribute to a mission-driven team where curiosity, precision, and impact drive secure digital outcomes.

Education

SUNY Canton (NSA CAE-CD Designated)

Dec 2025

Bachelor of Science – Cybersecurity, GPA: 4.0

Relevant Coursework: Information Security, Ethical Hacking & Penetration Testing, Incident Response and Disaster Recovery, Digital Forensics, Defense and Countermeasures, Data Communications and Network Technology

Nassau Community College

2018

Associate of Science - Liberal Arts and Sciences

Work Experience

National Video Investment Associate

June 2023 - Present

Publicis Collective (Pfizer) | New York

- Executed digital campaign operations in alignment with Pfizer's compliance standards, supporting secure data handling, process integrity, and audit-ready reporting workflows.
- Maintained detailed documentation of media transactions and performance logs, supporting audit-readiness, transparency, and risk mitigation.
- Conducted advanced data analysis and quality checks to ensure the integrity and security of digital reporting outputs across high-visibility campaigns.
- Collaborated with cross-functional teams to align digital and traditional media systems, troubleshooting discrepancies and flagging data flow issues that impacted reporting accuracy
- Developed reporting dashboards using tools like Tableau and Excel, supporting audit-readiness and helping senior stakeholders make data-driven decisions.

Sales Consultant

Jan 2016 - March 2023

AT&T | Queens, NY

- Provided Tier 1 support for devices, including Windows/Mac systems and Wi-Fi/network configurations, diagnosing issues and delivering secure, customer-friendly solutions.
- Documented repeatable troubleshooting processes into internal knowledge base articles, helping new hires resolve technical issues independently and efficiently.
- Followed strict authentication and device reset protocols to prevent unauthorized access to customer accounts, reinforcing data privacy and company security standards.
- Flagged and reported suspicious account activity (e.g., SIM swaps, device cloning patterns) to internal fraud/security teams, helping prevent identity theft and account takeovers.

Core Skills**Technical Tools & Platforms:**

Wireshark, Snort, Burp Suite, Nmap, Wfetch, SQL, Salesforce, Tableau, JIRA, Duo, VoiceThread, Office 365, Linux, Google Workspace, Outlook

Security & Networking:

Vulnerability Management, Penetration Testing, Security Policies, Encryption, Intrusion Detection Systems (IDS), Network Traffic Analysis, Information Security, Security Assessments, Root Cause Analysis

Cybersecurity Fundamentals:

NIST Cybersecurity Framework, Incident Response Planning, Risk Assessment, Digital Forensics, Security Research, Audit Reporting, Data Protection, Threat Intelligence

Soft & Transferable Skills:

Analytical Thinking, Detail-Oriented, Communication, Documentation, Client Support, Problem-Solving, Cross-Team Collaboration

Certificates**Data Analyst Certificate**

August 2022
